

# CELL PHONE MOBILE PROTECTION BOX (CMPB)

Specifically designed to provide inexpensive speech protection from the threat posed by cell phones in secure areas or meeting rooms

**The Cell Phone Mobile Protection Boxes provide an effective solution to the security risk of having cell phones in sensitive areas and meeting rooms ... when the devices may be transmitting or recording speech.**

The CMPB range recognizes that we live in a electronically connected world, but cell phones introduce a serious security risk in secure areas and meeting rooms.

The Cell Phone Mobile Protection Box houses a proprietary protection device that inhibits the microphones within cell phones, without affecting their ability to receive phone calls, text messages, emails, etc. In operation, it is silent to the user; It has a safe working level without damaging cell phone handsets. Effective on the latest cell phones that have high quality in-built microphones.

**NACE**
